

The TORR 130 offers an economical solution for accurate filling of bags and pouches from 0.75 to 20-liter capacity.

Standard features include turbine flowmeter, an air control pad to minimize air entering bag post-fill, AutomationDirect PLC and pneumatics.

Bag uncapping, fill nozzle placement, and recapping are performed by the operator using a lever arm. A push button starts the filling cycle. The touch panel allows the operator to select bag size and fill volume and has a built-in cycle counter with reset ability.

Shipping Weight: 380 lb

See it in action at

PRODUCT MEASUREMENT

1" turbine flowmeter is standard, +/- 0.5% accuracy by volume. Optional magnetic or mass flowmeter for hot fill or particulate products.

PRODUCT CONTACT SURFACES

316L Stainless Steel and FDA food grade plastics and flexible lines.

UTILITIES

Power Standard – 110 VAC 50-60Hz @ 3 amps.

Power with Optional Pump – 240 VAC @ 10 amps.

Air – 90 PSI @ 2 CFM clean, dry air.

Nitrogen – Available as an option.

PERFORMANCE

Bags per minute is dependent on operator agility and pump flow rate.

1.5 liter, 3-4 BPM; 3-liter, 2-4 BPM; 10 liter, 2-3 BPM

(Filler is shown with optional product pump)

OPERATOR INTERFACE

Touch screen functions are auto mode, manual, CIP operation, batch counting and fill volume adjustment.
