

130-3A

SEMI-AUTOMATIC BAG FILLER

The TORR 130-3A filler has been verified by a third party authority to conform to the sanitary design criteria for 3-A Sanitary Standard number 17-13 and is authorized to display the 3-A Symbol.

Easy to clean, inspect and maintain, the 130-3A is an economical solution for accurate filling of bags from 1- to 20-liter capacity.

Using a lever arm, the operator uncaps the bag and positions the fill valve into the bag gland. A push button starts the filling cycle. The operator then moves the fill valve up and out of the gland and recaps the bag using the lever.

Standard features include turbine flowmeter, an air control pad to minimize air entering bag, Automation Direct PLC and pneumatics.

Shipping Weight: 380 lb

PRODUCT MEASUREMENT

1.5-inch stainless steel turbine meter included with filler.

PRODUCT CONTACT SURFACES

All piping is 316L Stainless Steel and 3-A certified plastics and flexible lines.

UTILITIES

Power Standard - 110 VAC 50-60Hz @ 3 amps.

Power with Optional Pump - 240 VAC @ 10 amps.

Air - 90 PSI @ 2 CFM clean, dry air.

PERFORMANCE

Bag fill rate is dependent on product flow rate to the filler and operator dexterity. Rates up to 300 bags per hour based on 3-liter.

(Filler is shown with optional 3-A product pump)

OPERATOR INTERFACE

Touch screen functions are auto mode, manual, CIP operation, batch counting and fill volume adjustment.
