

145B

HIGH PRODUCTION AUTOMATIC WEB FED BAG FILLER

TORR Fillers combine proven, robust, dependable mechanical design with high quality controls and pneumatics to provide a reliable 24/7 bag in box automation solution.

The 145 bag filler is fed with a web or perforated ribbon of bags with the cap trailing. The bags are filled automatically while still on the web. The empty bag is indexed automatically to the fill head. The fill head un-caps, fills, and re-caps the bag.

PRODUCTION

Dependent on flow rate of product to filler. If product is delivered at a minimum of 60 gallons per minute the filler will typically produce.

- 12 to 15– 1 gallon bags per minute
- 10 to 12 - 2.5 gallon bags per minute
- 8 to 10 – 5 gallon bags per minute

ELECTRICAL

220 VAC single phase 50-60Hz @ 40 amps, or
480 VAC single phase 50-60Hz @ 30 amps.

AIR

7 cfm @ 90 psi.

NITROGEN

12 cfm @50 psi.

WEIGHT

Approximately: 1,400 lbs.
