Pre Infusion...

TORR now offers a semi automatic version of its fully automatic Fusion, pre infuser, mixers and cell loaders for less than half the investment.

The end result is the same as the fully auto unit without the automatic weigh scale and hopper. The water is measured from an integrated water tank with a level control. Product is batched by hand; water is added and blended automatically.

A bit more labor with the same end result, producing a superior product at optimum yield within the same 30 minute brew times.

All at the more affordable price of \$35,000.
